General

The vandal security lens will protect fixtures against abuses ensuring reliable performance.

Low-profile design ideal for high abuse areas in institutions, schools, housing complexes, and public transport facilities.

Housing

The housing is made of 20 GA. steel finished in white and assembled with tamper proof screws.

The ballast cover is easily removable.

Lens

Clear high-impact polycarbonate lens with prismatic texture for maximum light control and efficiency.

Electrical

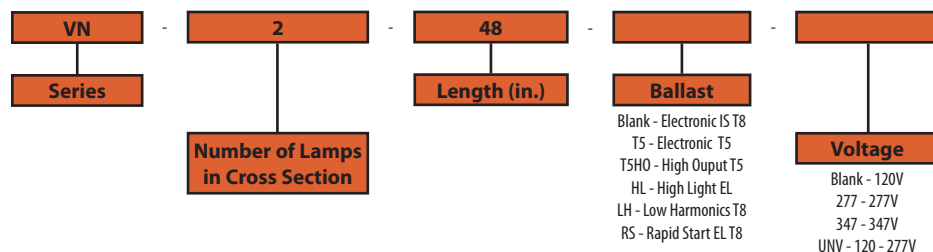

Available in electronic ballasts only.

Available voltages: 120V/277V/347V and UNV.

Approval

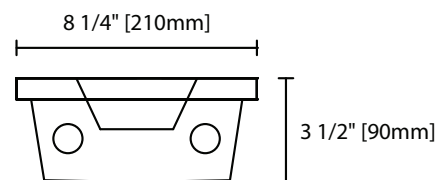

UL certified.
