

THE PIONEER PL ADVANTAGE

All Pioneer LED fixtures use premium North American brand name components which meet all CSA/UL/AISI/DLC standards. We offer the latest technology, cutting edge designs and fully integrated light engine capabilities, manufactured to the highest industry standards. Available in a wide variety of lumen packages for all indoor applications.

Advanced thermodynamic designs ensure maximum thermal protection for better efficiency and superior lumen maintenance. -40°C to 40°C operating temperature; ROHS compliant, DLC ready.

L70 at 115,000 hours with 5 year warranty; optional L85 at 52,000 hours with 10 year warranty.

All luminaires are made with care in our Toronto facility and are CSA listed for Canada and U.S. DLC pending. Unique optic designs enhance photometric distribution. Custom lumen packages available.

Drivers:

- UL Class 2 listed
- 347v available; direct input – no auxiliary transformer
- 0-10v analog dimming control
- Compatible with most dimming and photo sensor systems
- Optional tuning/programming for precise output & ideal lumen efficacy
- THD/PF auto correction

Standard entry grommets provide protection & reliability

Modules:

- Optimum photometric distribution, colour consistency, and spectral power distribution
- Excellent stable lumen maintenance
- Connectors on both ends
- Zhaga or Zhaga/Hybrid mounting
- High lumen/high efficiency modules available for hi-bays, etc.

Pre-set offset fasteners ensure uniformity, stability & efficiency
